Continuation of 11. does NOT place the application in condition for allowance because: The Applicant asserts that Ho fails to disclose or render obvious the present invention. More specifically, Applicant asserts that Ho's "bet-by-bet" analysis could not succeed in large scale applications.

The Examiner respectfully disagrees.

As claimed, the present invention recites, "at each auxiliary controller, receiving data from one or more of its respective set of gaming terminals, the data including at least one gaming terminal identifier and associated gaming terminal accumulated amount;" As such, in the case where there is only one game terminal being used per auxility controller, only the accumulated amount from that particular controller need be received. Thusly, the Applicant's characterization of Ho meets the claimed limitations. Furthermore, with regard to the Ho's disclosure of a gaming site. The use of a variety of gaming terminals and central jackpot system is old and whown in the art in addition to the disclosure of Ho. As such, it would involve minimal skill in the art to incorperate such functionality into a plethora of gaming schemes. Applicant seems to at a minimum, admit in (i) that Ho's disclosure is clearly relevant, however, the Applicant's concerns to Ho's use in a large scale application are still met based on the current claim language.
